Customer Philosophy

Respect for Existing Procedures

Emphasis on Customization

Focus on Solutions

What makes an audit successful?

Based on our 25+ years of audit experience, successful audits are based on answers to three basic questions:

1. Why are you auditing?
2. What are you auditing?
3. What audit approach serves your purpose?

Why Audit?

Before starting any audit, know why you are doing it.

Audits serve three purposes:

1. Compliance
2. Control
3. Cash

Not mutually exclusive, just different.

What do you want to achieve?
NOT what does your payer allow?

What are you auditing?

Payments		Claim audit
People		Eligibility/Enrollment audit
Process		Site visit
Contracts		Document review
Issues		Custom analyses

What audit approach serves your purpose(s)?

Why are you auditing?	The right tool for the job you want.		
	Random Sample Audit	100% Data Audit	100% Data Audit with Recovery Pursuit
Compliance			
Control			
Cash			
	“Easy” Button	Today’s “Prudent Person”	New dimension to audit results. Expect resistance.
